

In Case You Missed It

Last week, along with the @City of Ilwaco and the Port of Ilwaco, the Lower Columbia Estuary Partnership co-hosted an open house at @Salt Hotel and Pub to present design concepts for the Baker Bay Stormwater Project. Community members provided important feedback on the plans at the open house. If you missed it, it's not too late to give input! You can learn more about the Baker Bay Stormwater Project, see concept designs, and provide input at: <https://www.estuarypartnership.org/bakerbay>

The project aims to deliver cleaner water to Baker Bay through the installation of stormwater infrastructure that captures and treats polluted stormwater runoff along Howerton Avenue and its adjacent parking lots. Construction is slated to begin in late 2023 – early 2024.

For more information contact Stormwater Project Manager Aaron Guffey at (971) 380-3790 or aguffey@estuarypartnership.org.
